Detailed Action

Drawing

- 1. The drawings are objected to because of the following minor informality:
 - > Figs. 1 and 2: delete the word "Applicants"

Specification

2. The specification is objected to because of the following minor informalities:

The listing of references in the specification (see pages 8-9) is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A (1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the examiner on form PTO-892 has cited the references, they have not been considered.

Claim rejection - 35 U.S.C. 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Application/Control Number: 10/813,436

Art Unit: 2857

4. Claims 1-10 are rejected under 35 U.S.C. 101. The claimed invention is directed to non-statutory subject matter with no practical application (even if written in a method form). Law of nature and natural phenomena are the exceptions to statutory subject matter. For instance, "quantification of the earth's surface area heat flow" and "evaluation of the thermal state for related oil and natural gas" are governed by the thermodynamics law of nature and the claims do not exhibit a practical application.

The subject matter that is not a practical application or use of an idea, a law of nature or a natural phenomenon is not patentable. See, e.g., *Rubber-Tip Pencil Co. v. Howard, 87 U.S. (20 Wall.) 498, 507 (1874)* ("idea of itself is not patentable, but a new device by which it may be made practically useful is"); *Mackay Radio & Telegraph Co. v. Radio Corp. of America, 306 U.S. 86, 94, 40 USPQ 199, 202 (1939)* ("While a scientific truth, or the mathematical expression of it, is not patentable invention, a novel and useful structure created with the aid of knowledge of scientific truth may be.").

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant disclosure.

Art Unit: 2857

- > <u>Broodman</u> (U.S. Patent 4,817,672) teaches an apparatus for heating gases to very high temperature for purposes of generating steam.
- Van Huisen (U.S. Patent 3,889,473) teaches geothermal channel and harbor ice control system.
- ➤ <u>Lobo et al</u>. (U.S. Patent 4,861,167) teaches line-heat-source thermal conductivity measuring system.
- ➤ <u>Valenti et al</u>. (U.S. Patent 5,320,071) teaches devices for indirectly heating fluids.
- Radebold (U.S. Patent 4,381,462) teaches an alternative modes of hydrazine synthesis for using nuclear reaction as a primary heat source.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elias Desta whose telephone number is (571)-272-2214. The examiner can normally be reached on M-Thu (8:30-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc S. Hoff can be reached on (571)–272–2216. The fax phone numbers for the organization where this application or proceeding is assigned are (703)–872–9306 for regular communications and After Final communications.

Art Unit: 2857

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571)-272-1750.
